

HOPE CHAPEL SAN SALVADOR

Church Plant - San Salvador

On October 8, 2017, we officially launched Hope Chapel San Salvador, having felt from the Lord, along with our leadership, that it was time to plant. As FMI missionaries since 2014, we continue to serve the Foursquare church of El Salvador in a supervisor role and support to our national board.

The first year of the plant we started with weekly meetings working through a series on the book of Acts, English classes for the community, began OVS and focused on developing a team.

We decided to plant in the strategic area of San Benito in the capital, and were offered a very affordable office space from Union Church, a non-denominational English speaking church informally linked to the U.S. Embassy. As our team has grown, they offered us use of the sanctuary once a month for our "Friends & Family" outreach service. (You can see the comparison photos below)

This partnership has been great to get us launched, but it is temporary. We are currently in a fund-raising process to help Hope Chapel get it's own home. Outside support and church offerings need to increase by \$2,000-\$5,000 monthly in order to make this move.

We are also projecting an additional \$10,000 for additional chairs, equipment and refurbishing of the new space when we move.

OVS in El Salvador

At right, you can see some of our graduation photos. To date, we have had 17 OVS classes in 6 churches, levels 1-3 with 159 total graduates.

Currently OVS Level 1 serves as our entry door for serving on our leadership team. Those who are interested in serving are told that we are not looking for volunteers currently, but rather disciples who are willing to serve the Lord.

OVS GRADUATIONS

*Hope Chapel, Levels 1 & 3,
March 2019*

*Usulután, rural church,
extended 9-week class
graduation, 2016*

*Nuevo Amanecer, Santa Ana,
Levels 1 & 2
33 graduates*
